

As Federal Mogul TP Liner Europe Automotive Ltd., we will provide a healthy and safe working environment by protecting the environment affected by our activities, products, and services. Therefore;

- To meet and exceed the requirements of environmental laws, standards, and procedures,
- To manage the environmental system in accordance with ISO14001 and to continuously improve our overall performance and environmental management system to achieve our company's zero defect goal in every work we do,
- To protect our employees and the environment, we will control, reduce, and prevent waste by using current best practices, starting with the principle of not polluting the environment rather than cleaning it and we will use global resources effectively and recycle it.
- We will communicate this policy to all our employees and provide the resources and training necessary to implement the policy.
- To define, implement, and develop environmental goals and objectives as part of our business plans,
- To define appropriate environmental performance measurements, evaluate measurement results, and recognize and publicize successful practices,
- To conduct internal audits to ensure compliance with and continuous improvement of the environmental management system, and to consider their results in management review meetings,
- Identifying potential improved environmental practices through benchmarking and participating in collaborative programs to develop these practices,
- Identifying, considering, and minimizing the potential environmental impacts of new and changing products and production processes during research, development and investment efforts,
- To consider the environmental performance of suppliers and contractors when selecting them and to cooperate with them on environmental matters,
- To work constructively with government agencies, individuals, and concerned citizens on environmental matters,
- Our policy is public

We are committed to this. It is the responsibility of all our department managers to provide the leadership and resources necessary to implement this policy.

Koji Okuyama
Operations Director
