

## TPR invests in Aquarius Engines, free piston linear engine developer.

October 30, 2020

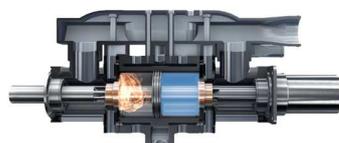

TPR has invested in Aquarius Engines, an Israeli startup that has original technology for developing epoch-making engines.

Aquarius Engines, founded in 2014 and headquartered in Rosh Haayin, Israel., is developing super-light-weight linear engines. The company has successfully realized “free piston linear engine,” which has less than 20 components, is very small, light-weight and highly efficient. Aquarius Engines is aiming to supply accessible and affordable electricity systems with this liner engine, and to provide various electric supply solutions for the upcoming market demands. (Aquarius Engines web site: [www.aquariusengines.com](http://www.aquariusengines.com))

Through this agreement, TPR will develop engine parts for Aquarius and will work jointly on performance improvement of their free piston linear engine by sharing our experienced technology. TPR will also strive for developing engines with Aquarius’s environmentally friendly power generators, and utilizing technologies for the development of next-generation fuel engine parts by collaborating with Aquarius.

And this agreement will be a foothold for TPR to enter new business field, and will accelerate our corporate mission, “(Aim for) Inclusive, Ecological, Game-changing & Sustainable (growth)”.
